VISTA FOLD™

THERMALLY BROKEN FOLDING DOORS

The thermally broken Vista Fold™ aluminum door system provides unobstructed views and seamless transitions to the outside. Euro-Wall thermally broken folding doors systems can span heights up to 168", widths up to 52", can be configured as a radius or postless corner systems and can span any opening width with an unlimited number of sequential panels. Vista Fold™ applications are Florida Product Approved.

- One (1) installation anchor is required at each location shown unless specified in the anchor schedule. Two (2) installation anchors at the jamb.
- The number of installation anchors depicted is the minimum number of anchors to be used for product installation of the maximum size listed.
- Install individual installation anchors within a tolerance of $\pm 1/2$ inch the depicted location and spacing in the anchor layout details (I.E. without consideration of tolerances). Tolerances are not cumulative from one installation anchor to the next.
- Shim as required at each installation anchor with load bearing shim(s). Maximum allowable shim stack to be 1/4 inch. Shim where space of 1/16 inch or greater occurs. Shim(s) shall be constructed of high density plastic or better.
- For masonry or concrete openings, 1x wood buck may be used (optional as long as the minimum embedment and edge distance requirements are still met within the corresponding host substrate.)
- Minimum embedment and edge distance exclude wall finishes, including but not limited to stucco, foam, brick veneer and siding.
- Installation anchors and associated hardware must be made of corrosion resistance material or have a corrosion resistant coating.
- For hollow block and grout filled block, do not install installation anchors into mortar joints. Edge distance is measured from free edge of block or edge of mortar joint into face shell of block.
- Installation anchors shall be installed in accordance with anchor manufacturer's installation instructions, and anchors shall not be used in substrates with strength less than the minimum strength specified by the anchor manufacturer.
- Sill shall be set in a bed of structural silicone.
